Volume 137 1983

Table of Contents

No. 1–2 1–376 issued on December 1, 1983
No. 2 377–644 issued on December 15, 1983

14th Sir Hans Krebs Lecture. Mechanisms of replication of the *Escherichia coli* chromosome
A. Kornberg 377–382

The control of variant surface antigen synthesis in trypanosomes
P. Borst, A. Bernards, L. H. T van der Ploeg, P. A. M. Michels, A. Y. C. Liu, T. de Lange, and J. M. Kooter 383–389

Lysosomes revisited
C. de Duve 391–397

Corrections 643

Nucleic acids, protein synthesis, and molecular genetics

Evidence for the presence of a hole in the capsid of turnip yellow mosaic virus after RNA release by freezing and thawing. Decapsidation of turnip yellow mosaic virus *in vitro*
M. Katouzian-Safadi and C. Berthet-Colominas

Appendix: Small-angle scattering of open isometric capsids
J. Witz and J. Kruse 47– 55

Ricin and *Ricinus communis* agglutinin subunits are all derived from a single-size polypeptide precursor
A. G. Butterworth and J. M. Lord 57– 65

On the cytotoxicity of vitamin C and metal ions. A site-specific Fenton mechanism
A. Samuni, J. Aronovitch, D. Godinger, M. Chevion, and G. Czapski 119–124

An absolute requirement for the 5′ cap structure for mRNA translation in sea urchin eggs
M. M. Winkler, G. Bruening, and J. W. B. Hershey 227–232

Cloning and characterization of the ribosomal genes of the sea-urchin *Paracentrotus lividus.* Heterogeneity of the multigene family
C. Passananti, A. Felsani, R. Giordano, S. Metafora, and C. Spadafora 233–239

Synthesis of photosynthetic membrane proteins directed by RNA from rough thylakoids of *Chlamydomonas reinhardtii*
M. M. Margulies 241–248

A small chromatin-associated RNA homologous to repetitive DNA sequences
V. Holoubek, N. J. Deacon, D. W. Buckle, and H. Naora 249–256

Cell-free synthesis of rat α_2-macroglobulin and induction of its mRNA during experimental inflammation
W. Northemann, T. Andus, V. Gross, and P. C. Heinrich 257–262

Defective complex formation between single-stranded DNA and mutant *recA430* or *recA1* protein of *Escherichia coli*
H. Wabiko, T. Ogawa, and H. Ogawa 263–267

Conformational studies of 13 trinucleoside bisphosphates by 360-MHz ^{1}H-NMR spectroscopy. 1. Ribose protons
C.-H. Lee 347–356

Conformational studies of trinucleoside bisphosphates. 2. Potential energy calculations
C.-H. Lee 357–363

Selective transcription of a cloned cauliflower mosaic virus DNA fragment *in vitro* by soybean RNA polymerase II in the presence of dinucleotide primers
R. M. Cooke, P. Penon, C. Got, and R. Miassod 365–371

Modification of ribosomal proteins in sea urchin eggs following fertilization
K. Takeshima and E. Nakano 437–443

Molecular characterization of the gene coding for major outer membrane protein OmpA from *Enterobacter aerogenes*
G. Braun and S. T. Cole 495–500

Purification and properties of a double-stranded ribonuclease from the yeast *Saccharomyces cerevisiae*
D. J. Mead and S. G. Oliver 501–507

Resolution of the discrepancy between a gene translation–termination codon and the deduced sequence for release of the encoded polypeptide
J. F. Atkins and R. F. Gesteland 509–516

Exodeoxyribonuclease from rat brain specific for single-stranded DNA
V. A. Ivanov, A. I. Gaziev, and T. M. Tretyak 517–522

Effect of interferon treatment on blockade of protein synthesis induced by poliovirus infection
A. Muñoz and L. Carrasco 623–629

Protein chemistry and structure

Evidence that the Y_b subunits of hepatic glutathione transferases represent two different but related families of polypeptides
D. Beale, D. J. Meyer, J. B. Taylor, and B. Ketterer 125–129

The identity of conformational states of reconstituted and native histone octamers
H. J. Greyling, S. Schwager, B. T. Sewell, and C. von Holt 221–226

The primary structure of turkey muscle acylphosphatase
G. Camici, G. Manao, G. Cappugi, A. Berti, M. Stefani, G. Liguri, and G. Ramponi 269–277

Sequence-specific resonance assignments in the ^{1}H nuclear-magnetic-resonance spectrum of the *LAC* repressor DNA-binding domain 1–51 from *Escherichia coli* by two-dimensional spectroscopy
E. R. P. Zuiderweg, R. Kaptein, and K. Wüthrich 279–292

Purification and characterization of various esterases from rat liver
M. Robbi and H. Beaufay 293–301

Binding sites for monoclonal antibodies and for mRNPs on SV40 large T-antigen determined with a cleavage map
M. Schwyzer, Y. Tai, E. Studer, and M. R. Michel 303–309

Protein conformation and proton nuclear-magnetic-resonance chemical shifts
A. Pardi, G. Wagner, and K. Wüthrich 445–454

Nidogen: a new, self-aggregating basement membrane protein
R. Timpl, M. Dziadek, S. Fujiwara, H. Nowack, and G. Wick 455–465

Proton-NMR studies of the solution conformations of vitamin-D-induced bovine intestinal calcium-binding protein
D. C. Dalgarno, B. A. Levine, R. J. P. Williams, C. S. Fullmer, and R. H. Wasserman 523–529

Enzymology

Mode of action towards oligopeptides and proteins of hydrolase H, a high-molecular-weight aminoendopeptidase from rabbit skeletal muscle
T. Nishimura, A. Okitani, R. Katakai, and H. Kato 23–27

NAD$^+$ analogue binding to glyceraldehyde-3-phosphate dehydrogenase
L. Wallén and G. Branlant 67–73

An evaluation of the role of a pyroglutamyl peptidase, a post-proline cleaving enzyme and a post-proline dipeptidyl amino peptidase, each purified from the soluble fraction of guinea-pig brain, in the degradation of thyroliberin *in vitro*
P. Browne and G. O'Cuinn 75–87

Purification and properties of bovine liver plasma membrane 5′ nucleotidase
J. Harb, K. Meflah, Y. Duflos, and S. Bernard 131–138

Purification and molecular properties of mouse alcohol dehydrogenase isozymes
E. M. Algar, T.-L. Seeley, and R. S. Holmes 139–147

The role of proteolytic enzymes derived from crude bacterial collagenase in the liberation of hepatocytes from rat liver. Identification of two cell-liberating mechanisms
M. W. C. Hatton, L. R. Berry, F. Krestynski, G. D. Sweeney, and E. Regoeczi 311–318

Analysis of competition for substrate sites in an allosteric enzyme with co-operative kinetics. Effects of dAMP and dUMP on donkey spleen deoxycytidylate aminohydrolase
S. Mastrantonio, R. Nucci, C. Vaccaro, M. Rossi, and E. P. Whitehead 421–427

o-Phthalaldehyde, a fluorescence probe of aldolase active site
K. Palczewski, P. A. Hargrave, and M. Kochman 429–435

Modulatory effects on proteinase kinetics caused by association of both enzyme and substrate to heparin
L. C. Petersen 531–535

Conformational properties of phospholipases A_2. Secondary-structure prediction, circular dichroism and relative interface hydrophobicity
M. J. Dufton, D. Eaker, and R. C. Hider 537–544

Classification of phospholipases A_2 according to sequence. Evolutionary and pharmacological implications
M. J. Dufton and R. C. Hider 545–551

Identification of the gene for DNA helicase II of *Escherichia coli*
G. Taucher-Scholz and H. Hoffmann-Berling 573–580

On the interactions of adenosine 3′,5′-monophosphate with the components of protein kinase I. A theoretical equilibrium analysis
S. Swillens 581–587

Carbohydrates, lipids and other natural products

Chemical structure of the lipid A component of the lipopolysaccharide from a *Proteus mirabilis* Re-mutant
Z. Sidorczyk, U. Zähringer, and E. Th. Rietschel 15–22

β-Agarases I and II from *Pseudomonas atlantica*. Substrate specificities
L. M. Morrice, M. W. McLean, W. F. Long, and F. B. Williamson 149–154

The lipopolysaccharide of a chloridazon-degrading bacterium
R. Weisshaar and F. Lingens 155–161

Cell-wall lipopolysaccharide of the urinary-tract-infective *Escherichia coli* 04:K12:H$^-$. Structure of the polysaccharide chain
M. A. Schmidt, B. Jann, and K. Jann 163–171

Structure determination of the carbohydrate chains of rat α-fetoprotein
B. Bayard, J.-P. Kerckaert, G. Strecker, L. Dorland, H. van Halbeek, and J. F. G. Vliegenthart 319–323

Structural studies on the phosphate-free lipid A of *Rhodomicrobium vannielli* ATCC 17100
O. Holst, D. Borowiak, J. Weckesser, and H. Mayer 325–332

Lipopolysaccharides of the cyanobacterium *Microcystis aeruginosa*
S. Raziuddin, H. W. Siegelman, and T. G. Tornabéne 333–336

Changes in proteoglycan composition of F9 teratocarcinoma cells upon differentiation
R. Kapoor and P. Prehm 589–595

Interferon-inducing, pyrogenic and proclotting enzyme of horseshoe crab activation activities of chemically synthesized lipid A analogues
M. Matsuura, Y. Kojima, J. Y. Homma, Y. Kubota, N. Shibukawa, M. Shibata, M. Inage, S. Kusumoto, and T. Shiba 639–642

Physical biochemistry

Oxidation of glutathione by the superoxide radical to the disulfide and the sulfonate yielding singlet oxygen
H. Wefers and H. Sies 29– 36

Kinetic and thermodynamic evidence of a molybdate interaction with glucocorticoid receptor in calf thymus
P. P. Cardo, M. Gambetti, B. Vignale, and M. C. Divano 173–178

Distance measurement by energy transfer. Ribosomal proteins L6, L10 and L11 of *Escherichia coli*
K. G. Steinhäuser, P. Woolley, J. Dijk, and B. Epe 337–345

Membranes and bioenergetics

The vanadate complex of the calcium transport ATPase of the sarcoplasmic reticulum, its formation and dissociation
P. Medda and W. Hasselbach 7– 14

Calcium/calmodulin-regulated guanylate cyclase and calcium-permeability in the ciliary membrane from *Tetrahymena*
J. E. Schultz, U. Schönefeld, and S. Klumpp 89– 94

Isolation, purification and characterization of the ATPase complex from the thermophilic cyanobacterium *Synechococcus* 6716
H. J. Lubberding, G. Zimmer, H. S. van Walraven, J. Schrickx, and R. Kraayenhof 95– 99

Characterization of reconstituted ATPase complex proteoliposomes prepared from the thermophilic cyanobacterium *Synechococcus* 6716
H. S. van Walraven, H. J. Lubberding, H. J. P. Marvin, and R. Kraayenhof 101–106

Subunit composition of oxaloacetate decarboxylase and characterization of the α chain as carboxyltransferase
P. Dimroth and A. Thomer 107–112

The presence of the iron-sulfur protein (subunit V) of complex III in mitochondria of heme-deficient yeast cells lacking iron-sulfur clusters detectable by electron paramagnetic resonance
C.-I. P. Lin, T. Ohnishi, L. Clejan, and D. S. Beattie 179–183

Study of the respiratory chain in *Micrococcus luteus (lysodeikticus)* by electron-spin-resonance spectroscopy
B. A. Crowe, P. Owen, and R. Cammack 185–190

Characterization of succinate dehydrogenase from *Micrococcus luteus (lysodeikticus)* by electron-spin-resonance spectroscopy
B. A. Crowe, P. Owen, D. S. Patil, and R. Cammack 191–196

Brown-adipose-tissue mitochondria: the regulation of the 32000-M_r uncoupling protein by fatty acids and purine nucleotides
E. Rial, A. Poustie, and D. G. Nicholls 197–203

Freeze-fracture analysis of membrane appression and protein segregation in model membranes containing the chlorophyll-protein complexes from chloroplasts
I. J. Ryrie 205–213

Identification of the α and β subunits of the chloroplast coupling factor one in *Chlamydomonas reinhardi*
S. Merchant and B. R. Selman 373–376

Synthesis and properties of NBD-*n*-acylcholines, fluorescent analogs of acetylcholine
H.-W. Meyers, R. Jürss, H. R. Brenner, G. Fels, H. Prinz, H. Watzke, and A. Maelicke 399–404

Redox-linked proton translocation in the b-c_1 complex from beef-heart mitochondria reconstituted into phospholipid vesicles. General characteristics and control of electron flow by $\Delta\mu_H$.
S. Papa, M. Lorusso, D. Boffoli, and E. Bellomo 405–412

Redox-linked proton translocation in the b-c_1 complex from beef-heart mitochondria reconstituted into phospholipid vesicles. Studies with chemical modifiers of amino acid residues
M. Lorusso, D. Gatti, D. Boffoli, E. Bellomo, and S. Papa 413–420

Synergistic inhibition of [^{3}H]muscimol binding to calf-brain synaptic membranes in the presence of L-homocysteine and pyridoxal 5'-phosphate. A possible mechanism for homocysteine-induced seizures?
R. Griffiths, D. C. Williams, C. O'Neill, I. C. Dewhurst, C. E. Ekuwem, and C. D. Sinclair 467–478

Isolation and characterization of a cytochrome b-f complex from pea chloroplasts
A. L. Phillips and J. C. Gray 553–560

lacZ$^-$-*Y*$^+$ fusions in *Escherichia coli*. DNA sequencing reveals the eight N-terminal residues of *lac* permease as non-essential
H. Bocklage and B. Müller-Hill 561–565

Characterization of β-galactosidase–lactose-permease chimaeras of *Escherichia coli*
H.-W. Griesser, B. Müller-Hill, and P. Overath 567–572

Cytochrome c_1 from *Paracoccus denitrificans*
B. Ludwig, K. Suda, and N. Cerletti 597–602

Chemical modification of the lactose carrier of *Escherichia coli* by plumbagin, phenylarsinoxide or diethylpyrocarbonate affects the binding of galactoside
J.-M. Neuhaus and J. K. Wright 615–621

Cellular biochemistry and metabolism

Stimulation of mixed-function oxidation of 7-ethoxycoumarin in periportal and pericentral regions of the perfused rat liver by xylitol
S. A. Belinsky, F. C. Kauffman, S. Ji, J. J. Lemasters, and R. G. Thurman 1–6

Microtubule assembly using the microtubule-associated protein MAP-2 prepared in defined states of phosphorylation with protein kinase and phosphatase
A. S. N. Murthy and M. Flavin 37–46

NADH oxidation in submitochondrial particles protects respiratory chain activity against damage by adriamycin-Fe^{3+}
E. J. F. Demant 113–118

Casein kinase activity in rat mammary gland Golgi vesicles. Phosphorylation of endogenous caseins
D. W. West and R. A. Clegg 215–220

Role of phosphate in the regulation of the Pasteur effect in *Saccharomyces cerevisiae*
R. Lagunas and C. Gancedo 479–483

Effects of the skin mitogens tumor-promotor 12-*O*-tetradecanoylphorbol 13-acetate and divalent-cation-ionophore A23187 on ion fluxes and membrane potential in a murine epidermal cell line (HEL30) and in 3T3 fibroblasts
D. Seemann, G. Fürstenberger, and F. Marks 485–494

The expression of different monooxygenases supported by cytochrome P-450 in neonatal rats and in primary fetal hepatocytes in culture
P. Kremers, F. Letawe-Goujon, J. de Graeve, J. Duvivier, and J. E. Gielen 603–608

Biogenesis of blowfly photoreceptor membranes is regulated by 11-*cis*-retinal
R. Paulsen and J. Schwemer 609–614

The insulin-stimulated receptor kinase is a tyrosine-specific casein kinase
Y. Zick, R. W. Rees-Jones, G. Grunberger, S. I. Taylor, V. Moncada, P. Gorden, and J. Roth 631–637
